BOARD OF CHIROPRACTIC EXAMINERS MEETING MINUTES

July 23, 2026

The Board of Chiropractic Examiners (Board) met via teleconference/Webex Events on July 23, 2026, from the following locations:

Department of Consumer Affairs
El Dorado Room
1625 N. Market Blvd., Suite N-220
Sacramento, CA 95834

4100 W. Alameda Avenue
Third Floor
Burbank, CA 91505

3455 Knighton Road
Redding, CA 96002

1545 Broadway, Suite 1A
San Francisco, CA 94109

1165 Park Avenue
San Jose, CA 95126

101 Andrieux Street
Sonoma, CA 95476

Board Members Present

Laurence Adams, D.C., Chair
Pamela Daniels, D.C., Vice Chair
Janette N.V. Cruz, Secretary
Sergio Azzolino, D.C.
David Paris, D.C.
Rafael Sweet

Staff Present

Kristin Walker, Executive Officer
Tammi Herrera, Assistant Executive Officer
Jose Salud Diaz, Administration & Licensing Manager
Lynne Reinhardt, Enforcement Manager
Becky Lyke, Lead Enforcement Analyst
Angelina Taylor, Administrative & Policy Analyst
Christine Jacob, Board Counsel, Attorney III, Department of Consumer Affairs (DCA)
Sam Singh, Regulatory Counsel, Attorney III, DCA

1. Open Session – Call to Order / Roll Call / Establishment of a Quorum

Dr. Adams called the meeting to order at 9:10 a.m. Ms. Cruz called the roll. The Board members were present from the following teleconference locations: Dr. Adams in Sonoma; Dr. Daniels in San Jose; Ms. Cruz in Sacramento; Dr. Azzolino in

San Francisco; Dr. Paris in Redding; and Mr. Sweet in Burbank. A quorum was established.

2. Public Comment for Items Not on the Agenda

Public Comment: None.

3. Board Chair's Report

Dr. Adams acknowledged the departure of former Board counsel Sabina Knight and thanked her for her four years of service and contributions to the Board. He welcomed new Board counsel Christine Jacob and noted that her experience and expertise will support the Board's mission of public protection. Ms. Jacob introduced herself and provided a brief overview of her professional background, including service as counsel for the Bureau of Real Estate Appraisers and approximately 20 years in private practice.

Dr. Adams also welcomed Angelina Taylor as the Board's new Administrative & Policy Analyst. Ms. Taylor introduced herself and shared that she recently joined state service from the private sector and is excited to support the Board's work.

Dr. Adams announced that Assistant Executive Officer Tammi Herrera will be leaving the Board on August 5, 2026, to accept a position with the Structural Pest Control Board. He thanked Ms. Herrera for her dedication and 18 years of service to the Board. Ms. Herrera expressed appreciation for the opportunity to serve the Board and the chiropractic profession.

Dr. Adams provided an update on the Board's sunset review process, noting that the Board secured nearly all of its requested proposals. He expressed appreciation to the Legislature for its engagement and support and recognized Ms. Walker for her leadership and significant contributions throughout the process. He shared that the proposals will strengthen public protection, enhance enforcement authority, modernize licensure categories, and address the Board's fund condition.

Dr. Adams reported that eight regulatory packages were completed by the Board in fiscal year 2025–26, representing the highest level of regulatory activity in a decade. He also provided an update on the Board's business modernization efforts, including the transition from paper-based processes to digital platforms. He concluded by highlighting the Board's expanded outreach efforts and recognizing Board members for increasing engagement with licensees and stakeholders, noting that these efforts have positively supported the Board's mission and strengthened relationships within the profession.

Public Comment: None.

4. Department of Consumer Affairs (DCA) Report Which May Include Updates on DCA's Administrative Services, Human Resources, Enforcement, Information Technology, Communications and Outreach, and Legislative, Regulatory, or Policy Matters

Tess Townsend from DCA's Office of Board and Bureau Relations provided an update on behalf of DCA. She reported that Governor Newsom appointed Rohit Chopra as Secretary of the newly established Business and Consumer Services Agency, which officially launched on July 1, 2026. She also provided an update on DCA's return to office transition, noting that DCA and other state departments returned to four days per week in the office effective July 1, 2026, and thanked Board leadership for their partnership in supporting staff during the transition.

She stated that the next Board Member Orientation Training (BMOT) is October 21, 2026, and reminded Board members that the training must be completed within one year of appointment and reappointment. She also noted that DCA launched its internal Defensive Driver Training on May 26, 2026, and encouraged Board members to use DCA's Learning Management System (LMS) to register for required trainings and monitor compliance with training requirements.

Public Comment: None.

5. Review and Possible Approval of Board Meeting Minutes

- A. January 16, 2026, Board Meeting
- B. April 16–17, 2026, Board Meeting

Dr. Daniels referenced the draft minutes of the April 16–17, 2026, Board meeting and inquired whether any additional information had been obtained in response to the Board's concerns regarding Senate Bill (SB) 980 (Hurtado). Ms. Walker reported that the bill did not advance out of the Senate Health Committee by the April 24, 2026, deadline and is now considered dead.

Motion: Dr. Daniels moved to approve the minutes of the January 16, 2026, and April 16–17, 2026, Board meetings.

Second: Dr. Azzolino seconded the motion.

Public Comment: None.

Vote: 6-0 (Dr. Adams-AYE, Dr. Daniels-AYE, Ms. Cruz-AYE, Dr. Azzolino-AYE, Dr. Paris-AYE, and Mr. Sweet-AYE).

Motion: Carried.

6. Review and Possible Ratification of Approved Doctor of Chiropractic License Applications

Motion: Dr. Daniels moved to ratify the list of approved applications for doctor of chiropractic licenses issued from April 1, 2026, to June 30, 2026.

Second: Ms. Cruz seconded the motion.

Public Comment: None.

Vote: 6-0 (Dr. Adams-AYE, Dr. Daniels-AYE, Ms. Cruz-AYE, Dr. Azzolino-AYE, Dr. Paris-AYE, and Mr. Sweet-AYE).

Motion: Carried.

7. Review and Possible Approval of New Continuing Education (CE) Provider Applications

Motion: Mr. Sweet moved to approve the continuing education provider applications by EliteChiroCE.com, Christopher Saincome, D.C., and SmartChiroCE.com – Donald L. Hayes, D.C.

Second: Dr. Daniels seconded the motion.

Public Comment: None.

Vote: 6-0 (Dr. Adams-AYE, Dr. Daniels-AYE, Ms. Cruz-AYE, Dr. Azzolino-AYE, Dr. Paris-AYE, and Mr. Sweet-AYE).

Motion: Carried.

8. Executive Officer's Report and Updates on:

- A. Administration, Continuing Education, Enforcement, and Licensing Programs
- B. Business Modernization Project and Implementation of Connect System
- C. Board's Budget and Fund Condition
- D. Status of Board's Pending Proposals
- E. Board's 2022–2026 Strategic Plan Objectives

Ms. Walker provided an update on Board operations and reported that staff's efforts since the April 16–17, 2026, meeting have been focused on the sunset review process, business modernization, enhancements to the Connect system and the Board's website, and improvements to the CE workflow. She reported that development of CE functionality in Connect is underway, including a CE provider dashboard, user authorization features, and the CE course application process. She explained that future phases will include provider self-service capabilities, improved public course search

functionality through the Board's website, bulk uploads of CE records, and potentially integration with additional technology platforms to support primary source verification, automate auditing processes, and reduce administrative burdens on licensees. She stated that the CE application functionality in Connect is anticipated to launch in fall 2026 in advance of the fee changes taking effect January 1, 2027.

Dr. Daniels asked whether the proposed CE systems would create redundancy and why staff preferred a website-based public search tool rather than the approach used by the Acupuncture Board in Connect. Ms. Walker responded that the systems are intended to perform different functions within a single workflow and are not expected to be redundant. She further explained that a website-based search tool would provide greater flexibility and improved search capabilities for users.

Ms. Walker indicated that she is awaiting a cost estimate regarding a potential upgrade to a newer version of the Connect platform and will return the matter to the Board for discussion when additional information becomes available.

She provided a legislative update and highlighted upcoming deadlines for the passage of bills. She also reported that the regulatory packages regarding inactive licenses and the repeal of the obsolete mental illness regulations were approved by the Office of Administrative Law and will become effective October 1, 2026. She stated that staff is reviewing pending regulatory proposals for consistency with the statutory changes currently being made through the Board's sunset bill.

She reported that staff is compiling 2025–26 licensing and enforcement statistics and the Board achieved its goal of reducing the pending enforcement caseload to fewer than 175 complaints, with 166 cases currently pending. She also reviewed the Board's updated fund condition report and stated that current projections indicate a modest surplus for 2025–26. She further noted that information regarding DCA's pro rata costs was included in the meeting materials.

Dr. Daniels asked whether staff had received information regarding the progress report submitted by Life Chiropractic College West on July 1, 2026, and requested clarification on the Council on Chiropractic Education's changes to the accreditation standards. Ms. Walker stated that she will research both matters and report back.

Public Comment: None.

9. Licensing Committee Report

- A. Committee Chair's Update on June 30, 2026, Meeting
- B. Review, Discussion, and Possible Action on Committee's Recommendation Regarding Regulatory Proposal to Establish Minimum Standards of Practice for Virtual Care (add California Code of Regulations [CCR], Title 16, section 318.2)

Dr. Daniels presented proposed virtual care regulatory language and requested the Board's feedback regarding an emergency exception to the initial visit telehealth requirements. She explained that the proposal would allow a practitioner to provide telehealth services in certain unplanned or emergency situations and then provide informed consent documentation, a summary of the visit, and recommendations within a specified timeframe. She requested input regarding whether the timeframe should be seven, 10, or 14 calendar days.

Dr. Azzolino supported shortening the proposed timeframe to seven days and provided several recommendations regarding the draft regulatory language. He questioned provisions requiring licensees to proactively provide license information and obtain telehealth consent, suggested adding language requiring the use of HIPAA-compliant platforms, and requested clarification regarding emergency response protocols.

Dr. Daniels and Ms. Walker explained that informed consent requirements for telehealth visits are established in statute and that the proposed regulations are intended to clarify compliance requirements. Ms. Walker further explained that emergency response protocols were included because telehealth visits present circumstances that differ from in-person care, including the need to identify a patient's location and establish procedures for responding to emergencies remotely.

Dr. Azzolino expressed concern regarding initial telehealth visits and asked how practitioners would comply with existing examination and evaluation requirements. Dr. Daniels discussed the practitioner's responsibility to determine whether telehealth is appropriate for the patient and service being provided. Ms. Walker clarified that the proposed regulations are intended to supplement, not replace, existing standards of care and that all existing laws and regulations governing chiropractic practice would continue to apply. Dr. Adams expressed support for the proposed framework and agreed that telehealth visits require additional safeguards beyond those required for in-person care. Ms. Cruz shared her experiences as a telehealth patient and described common practices, including collection of patient location information, completion of intake forms, and obtaining available vital sign information before appointments. Dr. Daniels stated that the Committee would further revise the proposal based on the Board's feedback and return the language for consideration at a future meeting.

Dr. Daniels then presented a draft proposal regarding the use of artificial intelligence (AI) in chiropractic practice. She explained that the proposal was based on guidance from the Federation of State Medical Boards and is intended to establish safeguards

that protect consumers while remaining adaptable to future technological developments. She noted that the proposal would place responsibility for all clinical decisions on the licensee and would require informed consent regarding the use, benefits, risks, and limitations of AI technologies.

Dr. Adams expressed support for the proposal and emphasized the importance of ensuring that AI serves as a tool rather than a substitute for professional judgment and clinical decision making.

Dr. Daniels explained that the proposal is intended to preserve patient autonomy, prevent discrimination, clarify practitioner responsibilities, and ensure that AI is not treated as a mandatory standard of care. She also requested feedback regarding the concept of a separate AI informed consent form. Dr. Paris asked whether the proposal adequately addresses the potential benefits of AI for patients. Ms. Walker clarified that the draft language authorizes the use of AI and requires disclosure of both the potential benefits and the risks associated with its use.

Dr. Azzolino suggested distinguishing between the use of AI for administrative functions, such as transcription and scribing, and its use for clinical decision support. Dr. Adams concurred and expressed concerns regarding data privacy and the use of patient information by AI systems. Dr. Paris supported development of a single educational and informed consent document that would explain the various uses of AI while minimizing confusion for licensees and patients.

Dr. Daniels stated that the Committee will continue refining the proposal and encouraged Board members to provide additional feedback between meetings. Ms. Cruz expressed appreciation for Dr. Daniels' leadership and work on the Committee's regulatory proposals.

Public Comment: None.

10. Review, Discussion, and Possible Action on Regulatory Proposal Regarding Continuing Education Fees, Requirements, and Approval Process (amend CCR, Title 16, sections 360, 361, 362, 363, and 364 and adopt section 360.1)

Ms. Walker presented proposed revisions to the Board's CE regulations and highlighted several recommendations for Board discussion. She proposed changes to narrow the list of approved CE accepted from other healing arts professions; remove adjustment, manipulation, and technique from the competencies requiring synchronous learning methods; eliminate distinctions between Board-approved and Providers of Approved Continuing Education (PACE) recognized CE providers; establish an expedited approval process for PACE-recognized providers; transition CE provider renewals from a biennial to an annual cycle; establish delinquency and late-renewal provisions for CE providers; and maintain annual, rather than three-year, approval periods for CE courses.

She requested feedback on revisions to the list of approved CE from other healing arts professions. Following discussion, Board members supported adding nurse practitioner CE to the approved list.

She also explained that PACE-recognized providers would be eligible for an expedited approval process while preserving discretion to refer applications to the full Board when appropriate. She further explained that the proposed changes would support implementation of the Connect system and help ensure that CE program fees adequately support administration of the program.

Motion: Dr. Daniels moved to rescind the prior approval of the proposed regulatory text from April 17, 2025, with the exception of the proposed regulatory text to amend California Code of Regulations, title 16, section 365, approve the newly proposed regulatory text to amend California Code of Regulations, title 16, sections 360, 361, 362, 363, and 364 and adopt section 360.1 presented in the Attachment to Agenda Item 10 in the meeting materials, with an edit to the language in section 361, subsection (d)(8) to include coursework that is accepted by the Board of Registered Nursing for renewal of a nurse practitioner license, direct staff to submit the text to the Director of the Department of Consumer Affairs and the Business and Consumer Services Agency for review and if no adverse comments are received, authorize the Executive Officer to take all steps necessary to initiate the rulemaking process, make any non-substantive changes to the package, and set the matter for a hearing if requested. If no adverse comments are received during the 45-day comment period and no hearing is requested, authorize the Executive Officer to take all steps necessary to complete the rulemaking and adopt the proposed regulations at CCR, title 16, sections 360, 360.1, 361, 362, 363, and 364 as noticed.

Second: Dr. Paris seconded the motion.

Public Comment: None.

Vote: 6-0 (Dr. Adams-AYE, Dr. Daniels-AYE, Ms. Cruz-AYE, Dr. Azzolino-AYE, Dr. Paris-AYE, and Mr. Sweet-AYE).

Motion: Carried.

11. Update, Discussion, and Possible Action on the Board's Sunset Bill, Assembly Bill (AB) 2775 (Committee on Business and Professions)

Ms. Walker provided an update on the Board's sunset legislation, AB 2775, and advised that the bill was last amended on June 30, 2026. She stated that all of the Board's requested proposals were included in the bill except for the proposed requirement for an automatic chaperone order for licensees facing criminal or administrative charges

involving sexual misconduct. She indicated that staff will continue exploring alternative approaches and future legislative options for that proposal.

She explained that the bill includes the Board's new fee schedule, which will become effective January 1, 2027, through statute without the need for additional regulations. She noted that the bill authorizes the Board to establish penalty fees for the late renewal of satellite office certificates and corporation certificates. She reported that the bill also authorizes the Board to establish a temporary license to practice chiropractic and a chiropractic facility permit and stated that staff will work with the Licensing Committee to develop regulations.

She highlighted that the bill includes the additional enforcement authority requested by the Board, including authority to automatically revoke a license following a conviction of a sex offense or a second insurance fraud conviction and to automatically suspend a license following conviction of a serious felony. She further explained that the bill authorizes the Board to consider any applicant discipline involving sexual misconduct regardless of when it occurred.

She clarified that the bill includes legislative intent language regarding continued stakeholder discussions on animal chiropractic but does not include substantive animal chiropractic provisions. She noted that the Veterinary Medical Board opposed inclusion of animal chiropractic language in the Board's sunset bill and stated that the two boards remain divided regarding regulatory authority over the practice, but both boards remain willing to continue discussions with stakeholders and the Legislature regarding the issue.

Dr. Daniels asked about feedback received from legislative staff regarding the Board's proposed chaperone authority. Ms. Walker responded that legislative staff requested additional justification and she noted that sunset legislation generally avoids proposals viewed as controversial. She suggested that the Board may pursue the proposal through separate legislation in the future.

Dr. Daniels expressed appreciation to Ms. Walker and staff for their efforts and stated that she was pleased with the number of proposals included in the bill. Dr. Adams concurred and commented that securing all but one of the Board's requests was a significant accomplishment. Dr. Azzolino also thanked staff for their work on the legislation.

Public Comment: A caller thanked the Board for its continued efforts to research animal chiropractic and for advocating that it serve as the regulatory authority for licensed chiropractors who are certified animal chiropractic practitioners.

12. Update, Discussion, and Possible Action on Other Legislation Related to the Board, the Chiropractic Profession, DCA, and/or Other Healing Arts Boards

- A. AB 1767 (Berman) Department of Consumer Affairs: public members of boards: conflicts of interest.
- B. AB 1775 (Ward) Veterans.
- C. AB 1811 (Rogers) Health professionals.
- D. AB 1979 (Bonta) Health care services: artificial intelligence.
- E. Senate Bill 1391 (Wahab) Department of Consumer Affairs: retired category licenses.

Ms. Walker provided an update on legislation affecting the Board and noted that several bills the Board previously reviewed were no longer active. She summarized AB 1767, which would require DCA boards to adopt regulations establishing criteria for determining when familial relationships may disqualify an individual from serving as a public member. She explained AB 1775 would expand expedited licensure pathways to certain former military members discharged pursuant to a federal executive order and implementation would have minimal fiscal impact because the Board could incorporate the changes into existing licensing processes.

She discussed AB 1811, which would require workforce data to be collected at the time of license issuance and would expand the information collected from licensees. She indicated the bill would require modifications to the Board's licensing processes but that updates to the workforce survey would be handled by DCA.

She provided an update on AB 1979, relating to the use of AI in health care. She stated that staff and the Licensing Committee will continue to monitor the bill to ensure consistency with the Board's ongoing development of AI regulations. She also discussed SB 1391, which would require boards that offer a retired license status to provide information about that license category on their website.

Dr. Azzolino expressed support for AB 1811 and commented that the bill could provide valuable information about the profession that may not otherwise be available.

Dr. Daniels asked for additional information regarding AB 1979 and its progress through the Legislature. Ms. Walker explained that the bill generally seeks to preserve licensees' independent professional judgment and prevent health care systems from using AI in ways that would override clinical decision making or replace licensed professionals with AI or unlicensed personnel. Dr. Paris commented that he was surprised the bill did not address the use of automated systems in insurance reviews and claims determinations.

Ms. Walker stated that AB 1979 has significant support and opposition from various professional associations, health systems, and business organizations. Dr. Daniels requested additional information regarding the bill's supporters and opponents, and Ms. Walker agreed to provide that information.

Public Comment: None.

13. Review, Discussion, and Possible Adoption of 2027–2030 Strategic Plan

Ms. Walker presented the draft 2027–2030 Strategic Plan developed by DCA’s SOLID Planning Solutions based on the Board’s strategic planning session held in April 2026. She requested feedback on the draft plan before it is returned to the Board for final approval at the October 2026 meeting. She noted that the wording of the proposed mission statement would be difficult to communicate succinctly during outreach activities. She also suggested revising Goal 1, Objective 1.4, related to creating an electronic CE workflow, explaining that the objective may be substantially completed before the new strategic plan period begins and could be broadened to reflect long-term improvements.

Ms. Cruz compared the proposed mission statement to the Board’s current mission statement and noted that the primary changes involved the order of certain terms and the replacement of “chiropractic care” with “advancing chiropractic competency.” Dr. Daniels suggested simplifying the mission statement to make it easier to communicate to stakeholders and recommended focusing on public protection through licensure, education, enforcement, and high standards of care.

Dr. Azzolino suggested removing “engagement” from the mission statement to shorten it, while retaining the concept elsewhere in the strategic plan. Dr. Paris suggested moving “engagement” to the Board’s values and recommended revisiting the vision statement to better reflect consumer expectations regarding safe and effective chiropractic care. Dr. Daniels noted the vision statement should reflect the Board’s aspirations, and Dr. Azzolino emphasized the importance of advancing chiropractic competency and maintaining high professional standards.

Public Comment: None.

14. Future Agenda Items

Dr. Daniels requested a future agenda item to discuss the Board’s authority to conduct site inspections, including verification of corporate registrations and practice locations. She also suggested exploring the use of AI to assist with preparation of meeting minutes to improve efficiency and reduce staff workload.

Dr. Paris reiterated his request for a future agenda item to discuss hands-on adjustments during CE courses.

Public Comment: None.

15. Closed Session

The Board met in closed session to deliberate and vote on disciplinary matters pursuant to Government Code section 11126, subdivision (c)(3).

The Board then returned to open session.

16. Adjournment

Dr. Adams adjourned the meeting at 12:28 p.m.
